

High Definition Audio

Enhance your Board Meetings with Clarity beyond Comparison

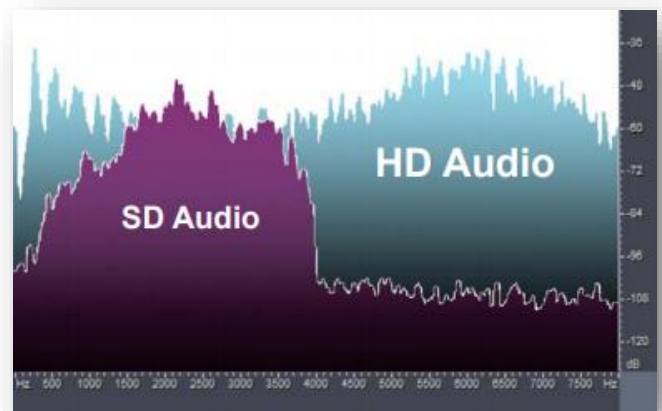

Clarity is a crucial element in communication.

Now Chorus Call can help you take your meetings held by conference call to a new level with the latest in audio technology. Not only will call participants using HD phones enjoy the better quality High Definition (HD) audio, but anyone participating on a smart phone can benefit as well. Like the jump from black and white to color television, once you experience the rich acoustics of HD audio you won't be satisfied with anything else.

[Contact us](#) or Call us at **+41 (0) 91 612 43 00** to find out how to offer HD audio on your next call.

Reduce Audio Fatigue

With HD audio your participants will hear a much wider audio spectrum otherwise absent from narrow-band conferencing. This richer sound alleviates fatigue on the ear, allowing your analysts and investors to focus on your presentation instead of straining to hear what they may be missing.

Decipher Accents

In the global marketplace there are many types of voices – each possessing a unique pitch, strength and articulation. Using HD audio will benefit members of your audience when they are struggling to understand an accent that is different from their own.

What you Need to Get Started

A VoIP telephone or HD-enabled soft phone, such as:

- ◆ Polycom SoundPoint IP 650 SIP
- ◆ Polycom SoundPoint IP 6000 SIP
- ◆ Polycom Soundstation IP 7000
- ◆ Cisco 790X
- ◆ HD soft phone examples: X-Lite, 3CX, PhonerLite, PJSIP, and Sipper

Technical Details for your IT Department:

When configuring physical VoIP phones, it is important to ensure that:

- ◆ The HD phone is registered by populating the field labeled as “SIP Proxy Server” or “SIP Registrar IP Address” with the appropriate IP address and port 5060
- ◆ The transport type is set to UDP
- ◆ Both the UDP and TCP port 5060 are open bi-directionally in the network.

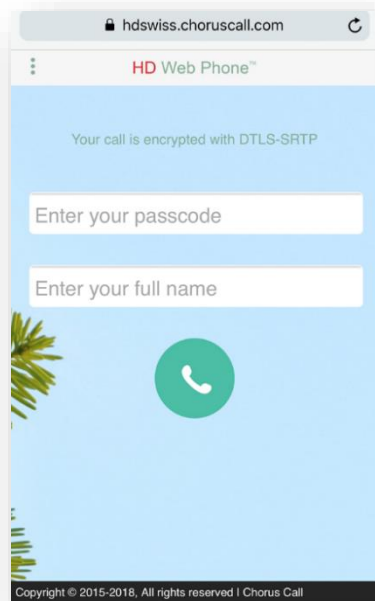

Benefits of HD

Use Wi-Fi to join a call, you will not have long distance charges

Improve the audio quality of your communication

Develop sound clearness, decipher accents and improve comprehension

- ◆ Use **High Definition (HD)** to avoid long distance charges!
